Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Prato *et al.* WO 00/10034 A1. Prato *et al.* shows all of the features of the instant invention including use of a virtual anatomical phantom to compare a calculated radiation distribution with a second radiation distribution (see abstract, pages 2, 8, and 9).

3. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Spitz *et al.* US 6,362,471 B1. Spitz *et al.* shows all of the features of the instant invention including an anthropomorphic radiation phantom that simulates the density of soft tissue and the layers of bone. See abstract, column 2 lines 25-50, column 3 lines 1-59, and column 4 lines 8-11.

Allowable Subject Matter

4. Claims 9-15 are allowed.
5. Claims 7, 8, and 17-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2882

6. The following is a statement of reasons for the indication of allowable subject matter: In the claims with allowable subject matter as claimed, claim 7 addresses the additional limitation of a hole large enough for a detector to rotate, claim 8 addresses the additional limitation of a cavity for a fluid, claims 9 (independent)-15 address a virtual anthropomorphic radiation phantom approximated by a physical anthropomorphic phantom that simulates at least soft tissue and other tissue, claims 17-22 address the additional limitation of a physical phantom modeling the virtual phantom, and claim 23 addresses the additional limitation of using Monte Carlo transport analysis to calculate the second radiation distribution. These features are neither shown nor fairly suggested in the prior art.
